Conclusion

This analysis provides a comprehensive and logical flow of Bitcoin transactions from the Robinhood address to the OKX Exchange address during March-April 2025. The transaction path follows a pattern of:

1. Initial funding from Robinhood
2. Accumulation at an intermediate address
3. Distribution to multiple addresses
4. Parallel transaction paths through multiple hops
5. Consolidation toward OKX-controlled addresses
6. Final destination at the OKX Exchange address

The complete transaction chain, with full transaction hashes, exact timestamps, and precise amounts, demonstrates a coherent flow of capital that aligns with typical cryptocurrency movement patterns. The funds can be conclusively traced from the Robinhood address to the OKX Exchange through this series of logically connected transactions.
